

Pavillon Greenville, SC Women's Program

Mondays, Tuesdays, and Thursdays 1-4pm

This innovative intensive outpatient experience focuses on foundational recovery concepts as well as issues that women often find as barriers to ongoing recovery such as relationships and sexuality, trauma and empowerment, parenting and pregnancy, hormonal changes and addiction, nutrition and body image, integrating inner and outer concepts of beauty, and learning how to become aware of our own feelings and needs without feeling selfish or giving away our power.

In addition to traditional abstinence-based treatment, we utilize various experiential modalities in order to get in touch with our mind, body, and spiritual connections to recovery. Our qualified staff incorporates art therapy, movement therapy, dream work, poetry, spiritual direction, and evidence-based energy work such as EFT, massage, and reiki into an individualized treatment plan co-created with the treatment team and the client to best meet the individual's needs, preferences, and learning styles.

Facilitators:
